

Preparing Your Home to Wow!

This is more important than you may think!

The 3 R's of Prepping Your Home for Sale

REMOVE.

Get rid of as much clutter as possible. Donate, sell it, put it in storage, but just get it out of the way! You want your home to look tidy, spacious and crisp.

REPAIR.

Chipped paint, cracked tiles, squeaky hinges, loose handles, leaky faucets. Fix everything you can! If you need a handy person or contractor, we can recommend one.

RENEW.

Clean, clean and clean again! Yes, it's that important! You want your home to look guest ready. Organize each room so that it looks like a showcase. A fresh coat of paint can go a long way to dramatically improving the look as well.

If this sounds overwhelming ... there is some good news: everything you remove, clean or repair helps to sell your home faster and for a better price! It's almost like getting paid to do it!
